blancco

CERTIFICATE

OF VERIFICATION

To Whom It May Concern,
Blancco hereby guarantees providing an outstanding product performance for a complete hard disk data erasure and related functions. By using Blancco – Server Edition, **Vobyte Automatisering B.V.** can assure their customers and associates that all data from the treated computers is completely erased and cannot be recovered by any existing technology during the period of **1st of November 2011** and **1st of November 2013**.

Furthermore, within scope of our new cooperation update, **Vobyte Automatisering B.V.** is appointed as a preferred partner towards performing Blancco wipe on customer location.

Product documentation and development is specific to each release of the software and follows a CMM Level 3, ISO15504 Quality System for software development.

Blancco - Data Cleaner+ is designed to meet and exceed requirements of BS7799, ISO17799, **British CESG - Infosec Standard** 5 and Manual S, **Nato** including listing on information assurance product catalogue, **Netherlands National Communication Security Agency AIVD**, HIPAA and all current **US Department of Defence** security specifications employing current technology standards to ensure effective erasure of data. The US Department of Defence specifications are stated in standard 5220.22-M, section VII in paragraph 2-21, under the title "Clearing, purging, declassifying, and destroying media".
